LEDlife NorDim200 Rotary LED dimmer

Rotary LED dimmer for FUGA 1 modul, suitable for LED bulbs and trailing edge/CR dimmable products

Rotary LED dimmer compatible with FUGA 1 module for flush-mounting and surface-mounting boxes and frames. It is especially suitable for LED light sources but can be used for other dimmable products suitable for trailing edge/CR dimming.

The dimmer has a smart function that allows it to be controlled with spring-loaded contacts, enabling you to manage correspondence and dimming from multiple locations.

The dimmer is protected against overheating and overloading.

Note that this LED rotary dimmer is used on the phase conductor, so there is no need for a neutral conductor to the dimmer.

LED light sources: 5-200 Watts
LED Drivers: 10-200 Watts
