Philips CorePro LED G24 Q-2 4-pins

G24 Q-2 4-pins Philips CorePro LED PL-C, that is a great replacement, that does not require any kinds of modifications of the existing installation. The model is available in 2 different models

G24 4-pins (HF) CorePro LED PL-C, that is a great replacement, that does not require any kinds of modifications of the existing installation.

The 4-pin bulb works with all electromagnetic ballasts. The bulbs can easily be used as a retrofit solution for replacing conventional 18W PL-C light sources.

The light can be rotated exactly where you want, with the bulb's rotatable end caps. It is possible to turn the bulb from an angle of -45 ° to + 90 ° to fit perfectly into any luminaire. This makes it possible to optimize the distribution of the light, thereby ensuring optimum illumination at the places where it is most needed.
