Serie 30 - Angle-brackets

Sturdy bracket in aluminium for joining two 3030 profiles in 90 degrees.

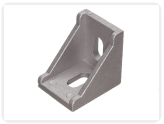

Sturdy bracket in aluminium for joining two 3030 profiles in 90 degrees. The bracket can be used on the inside of the joint of two profiles, or you can join the ends of two profiles.

There are small edges on the bottom of the brackets, that fit in to the slots of the profiles.

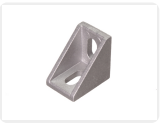

Notice the measurements, as we have different types. The Ø-measurement is the width of the slot for the bolt.
