Serie 20 - Gusset bracket

Strong 45, 90 and 135 degree angled brackets. Can be used when you need to make a triangle with the profiles.

Strong 45, 90 and 135 degree angled brackets. Can be used when you need to make a triangle with the profiles.

The placement of the two holes in the bracket, means that it works best when the profiles cannot be pushed together. Alternatively you need to join the profiles in the tip of the bracket.
