Serie 20 - T-nut, gliding

Gliding nut for series 20 profiles, that is put in to the end of the profile. Can be glided back and forth in the profile.

Gliding nut for series 20 profiles, that is put in to the end of the profile. Can be glided back and forth in the profile, until it has been fastened.

The nut is the best profile in regards to strength, and it cannot fall out of the profile. The disadvantage is of course that it needs to be pushed in to the profile before assembly.
