Serie 30 & 40 - Foot with threaded rod - Ø80

Strong and wide tiltable foot with threaded rod, with M8, M10 or M12 thread. Intended for system profiles, but is universal

Strong and wide tiltable foot with threaded rod, with M8, M10 or M12 thread.

The foot is in black plastic with a rough surface underneath. There are two holes in it that can be used if you need to fasten it too the floor. The threaded rod is 80-100mm depending on thread, making it very easy to adjust the feet to level the part. A nut is included on the rod, to lock the height of the foot.

The foot is intended for system profiles, but is universal.

The max weight is 1200kg, but this depends on how it is mounted.
