Fuseholder for panel mounting, glass fuse

Compact fuseholder that is mounted in a panel, eg. in a enclosure. Makes it easy to check and replace fuses.

Compact fuseholder for glass fuses 20x5mm, that is mounted in a panel, eg. in a enclosure. By unscrewing the top you get direct access to the fuse, without opening the enclosure. This makes it easy to check and replace fuses.

Wires are soldered on to the two terminals. The fuseholder is mounted on the included nut.
