Mi-Light RGB+CCT Remote

Wireless remote for setting color and functions on your Mi-Light RGB+CCT products. 8 zones.

This remote makes it easy to adjust the light color, saturation and color-temperature with the touch panel. There are also buttons for zone-control and setting effects and the speed of these. With 8 zones, you have plenty of options to customize the light in the individual rooms.

The remote has a compact and friendly design and size.

It uses 2 x AAA batteries, and a practical wall-mount is included with screws and double-adhesive tape for mounting it.

The remote can be used together with a touch panel and the Android & iPhone bridge, you simply set up the lights in the wanted zones.
