Mi-Light Android and iPhone bridge

Unit that allows controlling Mi-Light units with your smartphone and tablet - both Android and Apple units.

With a Wifi-bridge it is possible to control your floodlight through Android or iPhone. You simply need to link the app and the Floodlight. The app and the manuals are all english.

You connects the lights to zones as with a normal remote.

We recommend that you try to install the app on your unit before you purchase, so that you can check the compatibility: Download app for Apple-units - Download app for Android-units
