Mi Light RGB+CCT Touch panel

Nice touch panel that can be mounted on the wall, for controlling the colors and color temperature on you RGB+CCT Mi-Light units.

Nice and elegant touch control-panel for managing your Mi-Light RGB and RGB+CCT controllers and bulbs.

The control panel makes it easy to turn on and off, adjusting color, brightness, color temperature and effect-mode in 4 different zones.

The panel is tempered glass, which gives the control panel a luxurious look.

The built-in wireless transmitter has a 30 meter range. The model with 2 x AAA battery requires no connection, and can be screwed or taped on. A piece of double-adhesive tape is included.
