Mi-Light ZigBee (3.0+2.4G) GU10 RGB+CCT 4W bulp

Powerful GU10 smart-bulb in Mi-Lights CCT system, that can change color and color-temperature. Easy replacement.

Powerful GU10 smart bulb in the Mi-Lights CCT system, capable of changing color and color temperature, from cool white to warm white. It is easy to replace a "dumb" bulb with this one; just insert it into a GU10 socket and connect with a remote, touch panel, or Android and iPhone control.

The bulb has a standard GU10 size and fits all common GU10 sockets. No special connections are required to achieve smarter lighting.

The bulb can light from warm white to cool white, with a color temperature from 2700K to 6500K. Additionally, it can emit red, green, and blue, as well as any combination of white and all colors. You can freely choose between white light, pure color, and pastel colors.

This version has built-in Zigbee and can be controlled with devices like Philips Hue, Google Home, or other smart home systems. Just insert it and choose how you want to control it.
