LED Top light board for MAN 2014+

LED emitters that replace the original circuits in the top lights on the new MAN trucks. Easy to replace.

LED emitters 24V that replace the original circuits in the top lights on the new MAN trucks. The original emitters are taken apart by removing two metal clips, where after the board is taken out and the new put in.

The board has the same size, holes and connectors as the original, so the replacement is straight forward.
