BAY9S H21W Canbus, 50W CREE LED, 10-30V

Powerful BAY9S H21W LED Bulb 10 powerful 5W LEDs that give light equivalent to a 25W incandescent lamp.

Powerful BAY9S H21W LED Bulb 10 powerful 5W LEDs that give light equivalent to a 25W incandescent lamp.

With 2 LEDs on each side of the bulb, it will illuminate the entire lamp housing, and with 2 LEDs on the tip it will also brighten strongly forward.

50W is LED rating, while their real consumption is 4.5W.

With the bulb's high power consumption, the bulb control on most models may accept this LED bulb. However, in the event of an error, external interference resistors may be required.

You can of course also use these bulbs for cars without bulb control.
