Serie 40 - Roller element (80x40x18)

Smart roller-element module that is clicked on to a series 40 profile. Can be used for building gliding tracks or similar.

Smart roller-element module that is clicked on to a series 40 profile. Can be used for building gliding tracks or similar.

The bottom part with the three roles is put in to the track, where after you push the lid down on top. This locks the module in to the slot.
