Serie 40 and 30 - Roller wheel (Ø 39,5)

Wheel in hard plastic, that fits in to series 30 and 40 tracks (8mm). Can be used for securely guiding movable parts.

Wheel in hard plastic with a raised edge, that fits in to serie 30 and 40 tracks (8mm tracks). The wheel is used for guiding movable parts in the track of the aluminium profile. This could be a sliding door or similar. The wheel is made of durable nylon. The ball bearing ensures a smooth gliding motion, without wear.

The wheel is typically fastened with a M6 bolt through the ball bearing.
