Hella Luminator Chromium Celis Auxiliary Lamp - 12V / 24V

A large Hella auxiliary lamp in chrome with H1 and built-in Celis-ring, for mounting on cars and trucks. The large reflector gives a great light at long distances.

OUTLET: 1 PC. LEFT!

A large Hella Luminator auxiliary lamp with H1 socket and LED position light in chrome. The large size and light output makes it suitable for larger vehicles. At the same time it is made of stainless materials. The large reflector and clear front glass provides a good light at a long distance.

The lamp comes in a complete and beautifully processed chrome lamp housing. The headlight of the lamp is H1 (12V / 55W, 24V / 70W), and Hella's Celis-ring, which can also be easily replaced.

There comes a mounting bracket to the set made out of chrome and the necessary wiring harnesses, gaskets, bolts and nuts. There is a mounting instruction for the kit that includes German, English and Swedish.

If you want to mount H1 LED light in the lamp, we recommend our Performance kit Type 2. You can find them under accessories and related products

Likewise, if you want to change the Celis-ring, we can also help you with that. You can also find them under accessories and related.

The lamp is E-approved for both 12V and 24V vehicles.
