Serie 30 - End fastener

Clever clamp that is used in 90-degree joints of two profiles. When this is used, the two profiles cannot twist and loosen the bolt.

Clever clamp that is used in 90-degree joints of two profiles. The clamp is bolted on to the end of profile 1, where after your side profile 2 in over the clamp. The bolt is then fastened through profile 2 by using a access hole.

As the clamp is inserted in to both profiles, this prevents the profiles from twisting, and thus lostening the bolt.
