RGB+CCT LED strip, 50cm - 12V

Powerful strip with powerful LEDs, that can light both RGB, warm white and cold white. Adjust both color and temperature.

Powerful 12V strip with powerful LEDs, that can light both RGB, warm white and cold white. With the right color controller, it is possible to adjust both color and temperature, and mixing both.

The strip is built up of smaller circuits with 6 LEDs, where it is possible to cut the strip over. The length of each segment is 10cm, and it is clearly marked where you can cut.

While some CCT LED strips has seperate LEDs for color and white light eg. Philips Hue strips, this has one LED with both RGB, cold white and warm white built in.

The strips is sold in lengths of 50cm, and if you order 5pcs. you will receive one length of 250cm. We can deliver up to 5m lengths delivered in spools.
