Connectors that fits the lamps on Scania +2016 trucks. There is 1 meter red and black wire on the connector.

Connectors that fits the lamps on Scania +2016 trucks. There is ½ meter red and black wire on the connector.

You can use these if you want to make your own harness, or if you want to mount these in other places that standard.

Connector, Female

Can be used to connect original sun-screen lamps and side marker lights. There is ½ meter red and black wire on the connector, and a strain relief.

Connector, Male

The same connector which are on the marker lights. Can be used if you want to use the original female connector, but want to connect a different type of lamp. There is ½ meter red and black wire on the connector, and a strain relief.

Connector, Y-splitter

Splitter with one male, and two female plugs. Can be used if you want to connect to lamps to one female plug.

Adapter for old sunvisor lamps

If you want to use the large sunvisor lamps, but you have a wiring harness with new connectors, it possible to use this adapter. It connects to the new connectors on the wiring harness, and to the connector on the old sunvisor lamps.

Strain relief

Usually there should not be any pulls / strains on these wires, but if you want, you can buy strain relief seperatly. They are clicked on, and fastened with a cable tie, which secures the cable to the connector.
