V-Slot - Profile - 40x80 (C-beam)

Very sturdy V-slot profile, primarily intended for larger machines requiring high stiffness, eg. CNC mills.

Very sturdy V-slot profile, typically called C-beam, primarily intended for larger machines requiring high stiffness, eg. CNC mills.

It is possible to have V-wheels on the inside of the C-profile, but also on the outside.

The holes in the end of the profile are Ø4.7mm. Typically it is necessary to drill up to 5mm so you can make M6 thread

We offer cutting of profiles to your desired dimensions. Follow this link
