Cutting of profiles

If you want your profiles in a specific length, we can do that for you. Note in the order remarks the lengths you want in millimeters

If you want your profiles in a specific length, we can do that for you. We cut in straight cuts.

NOTE: The price is per cut, so if you have a profile that needs to be cut in 3 places, then you have 3 cuts in the basket.

We only offer custom cuts for measurements over 250mm!

When ordering please inform us which lenghts you want by writing a comment in the commentssection as shown on the picture above. All measurements must be given in mm / millimeters. The saw blade takes approx. 5mm material and since there can be a slight variation in the profile lengths, you should calculate an extra cut, if all the lengths need to have same measurements.

When ordering please inform us which goals / lengths you want by writing a comment in the comments field as shown in the picture.

If you are in doubt about your cutting, this link can help you with cutting and which profiles you should order.

Notice: If you chose profiles in custom lengths, the right to return is waived.
