# Regulator for DC motor, PWM - 10-30V, 3A

Compact speed regulator / motor controller for DC motors. Can be used for seperate DC motors, gear motors, actuators etc.

Compact speed regulator / motor controller for DC motors, with dial for speed and a 3 position toggle switch for chosing direction or stopping it. The speed can be regulated down to 5% depending on motor.

The contrioller can be used for seperate DC motors, gear motors, actuators etc. As it uses PWM for regulation, it will have a higher torque than if the voltage was lowered to a equivalent speed.

There are screw terminals for connecting to power and to the motor. You can disconnect both the switch and dial, making it possible to panel mount the controller.

## Specifications

| | |
|---|---|
| Max power | 100W |
| Voltage | 10-30V |
| Current (rated) | 3A |
| Current (max spike) | 4A |

**Regulator for DC motor, PWM - 10-30V, 3A**
SKU 609817
Mountinghole: 3,5mm
Dimensions: 27 x 74 x 47mm
