Electrical desoldering pump, 140W

Desoldering-station with built-in vacuum pump, that is activated when the trigger on the gun is pressed. Easily desolders parts in seconds.

Desoldering-station that has a built-in vacuum pump, that is activated when you push the trigger on the gun. The powerful 80W soldering tip and the effective vacuum makes it possible to desolder parts in seconds. For this reason, we use the same desoldering station in our production.

The display shows the set and current temperature. The target temperature is set with the two buttons in the front.

The following parts are included with the complete station:

- De-soldering station with vacuum pump
- De-soldering gun
- S2 tip (1.0mm)
- S3 tip (1.3mm)
- Gun holder
- Cleaning sponge
