Serie 30 - Cable holder with clamps

Smart holder for fastening cables, air hoses and similar to series 30 profiles. Self-locking model and model for bolting.

Smart holder for fastening cables, air hoses and similar to series 30 profiles. The holder is available as a self-locking model and model for bolting. There are two chambers, that can be opened and closed individually, without the use of tools.

The rubber-band in the holder ensures that the cables are not loose in the holder but securely fixed.

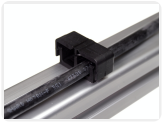

Notice that the holder is 40mm wide, and thus wider than standard series 30 profiles. The model with M4 hole can also be used in series 40 profiles.
