Serie 15 - Profile - 15x30

Strong profile that is intended for lids, doors and other parts demanding high stiffness. Two completely flat sides.

Strong profile that is intended for lids, doors and other parts that demand high stiffness. The profiles has tracks on the slim sides, and completely blank on the others.

You can easily make a solid frame using the corner-brackets, while the tracks can be used for panels, grid, transparent plastic for windows etc.

The profile has a 5mm centerhole, that can be directly threaded with M6.

We offer cutting of profiles to your desired dimensions. Follow this link
