Serie 15 - Corner bracket

Solid 90 degree bracket for joining two 1530 profiles. The profiles with threads in the center holes are bolted.

Solid 90-degree aluminium bracket for joining two 1530 profiles. The profiles with M6 threads in the center holes are bolted on to the bracket, and the included covers are placed in the holes.

You need M6 bolts with standard cylinder-head / cheese-head for these brackets. Other kinds of bolts will not fit.

A sturdy door-frame is easily made with 4 brackets and 4 profiles.
