Serie 30 - Corner joint

Small and solid bracket, for assembling 2 or 3 series 20 profiles in a corner. Gives you a strong joint with a great finish.

The corner joint is a small and solid bracket, for assembling 2 or 3 series 20 profiles in a corner. Threads are cut in to the end of the profiles, where after they are bolted through the bracket. The mountingholes are hidden with the included plastic caps.

This bracket gives you a strong joint, and as they have the same dimensions as the profiles, they give you a great finish.
