Serie 15 - Slot cover

Covers made from plastics, for covering the tracks in series 15 profiles. The covers hide the slot and prevent dirt from collecting in them.

Covers made from plastics, for covering the tracks in series 15 profiles. The covers hide the slot and prevent dirt from collecting in them.

They are easily pushed down in to the tracks, and are then held down securely, but are easy to take our again using a screwdriver.

The covers cut with a scissor or a sharp knife.
