T-track guide-rail system - Profile for measuring tape

Standard profile with space for a measuring tape, that can be used for positioning and measuring parts and fixtures.

Standard profile with space for built-in tape, that can be used for positioning and measuring parts and fixtures. It is typically used with other profiles and accessories, eg. end-stops and fences. The profile has the same dimensions as the standard profile, but is 45mm wide.

In the model with built in measuring tape, there are pre-drilled and countersunk holes for easy mounting
