T-track guide-rail system - Slider with angle

Slider with adjustable angle, intended to be used with the fence profile. Can be used for adjustable sled for table saw and similar.

Slider with adjustable angle, intended to be used with the fence profile. Can be used for an adjustable sled for a table saw and similar. The angle is easily readable and can be locked using the knurled knob.

The slider has built-in adjustments to reduce backlash.

It can only be pushed in from the end of the profiles, but you can easily remove the locks from the bottom, so it can be placed in to the track from above.
