MR11 Helios LED Bulb, 10-30V

MR11 LED bulb developed especially for use in cars, boats and trucks. Choose between white or colored models

MR11 LED bulb with a special driver that makes it possible to use these LED bulbs in boats and in vehicles where the voltage can be very fluctuating.

The LED bulb has the same shape as an MR11 halogen bulb, so it will be easy to replace the old bulbs. The light scattering is at 120 degrees, so you will experience a wider and even light rather than the old halogen bulbs.

We also sell suitable downlights for these bulbs in the case of a new construction.
