Prostrobe - Rechargeable LED workinglamp with magnetfoot

Rechargeable LED work-lamp with 4 functions, magnet foot for mounting on any metal surface and a flexible head.

Rechargeable LED Work-lamp with 9 LEDs that with its many functions and magnet-foot can be used in the workshop under the lift, on a camping-trip, fishing-trip, on the construction-side, etc.

There are 4 functions to choose from:

- 100% white working-light
- 50% white working-light
- White SOS-flash
- Amber flash-light

The lamp remembers the functions you have chosen, so when you turn it off and back on, it will continue as the same before. You can choose between the 4 functions by pressing the mode-button and tun off and on by pressing the on/off button.

The lamp can keep operating for 4 hours. Recharging takes also 4 hours. There are chargers included for both 230V and also a 12V charger with cigar-plug. When charging the lamp the indicator lights up in red and when it is fully charged it turns to green.

The rechargeable 18650-batteries can easily be replaced if needed by removing the lower base with the included.
