Mi-Light RGB+CCT set, controller og remote

Controller and remote in one package. Smart LED Control System with wireless intuitive touch remote control.

Now remote and controller are available in one set.
This set has many features. The set comes with a 2.4GHz RF controlable remoter.

Remote

The remote can change the color and color temperatures of the light, all with a single touch.

The system is built in so that you can also use your smartphone with a comfortable app belonging to the App, which means that you can use it from your smartphone with the same features as if you used the remoter. The wireless range extends up to 30m.

The remote has a compact and friendly design and size.

Controller

Color control system for 12V and 24V that can adjust both color and colortemperature - both RGB, warm white and cold white light. This means that the controller and the remote can control up to 5 color channels at the same time. Said in another way, you can control color, brightness, saturation and color temperature!

The controller is controller wireless (2.4Ghz) from a remote. Each controller works as a repeater, which allows you to handle many controllers over a long distance, as long as they are in contact with each other. The controller also synconize effects automatically, so that they follow each other.

- Five color channels with 1 output each (5 x 6A)
- Max 15A

There are screw terminals on all inputs and outputs, as well as a DC plug on the input, if your power supply has this (5.5 x 2.1mm)
