Prostrobe - Micro Rotor

The smallest Prostrobe beacon, which is designed with a built-in battery and magnet base, perfect for temporary mounting.

The smallest Prostrobe beacon, which is designed with a built-in LiPo battery and magnet base, perfect for temporary mounting.

The 8 powerful 3W LEDs create a bright light, and the animated rotor-mode makes it look like a real rotor-beacon. There is also an SOS flash and mode for always on.

The lamp is made from impact-resistant polycarbonate lens and aluminium housing, while the rubber base has 6 strong magnets built in.

The beacon has a USB-plug in the bottom for charging, where the on/off switch is also placed. The rotorbeacon has a 9 hour operating time, and a charging time of 2 hours.

CHARGE indicator:

- Red: Charging in progress
- Green: Charging done

POWER:

- On: Full power
- Double blinking: 50% power
- Quick blinking: Low power, recharge

Modes:

- Rotor-beacon
- SOS flash
- Always on
