Mi-Light RGB+CCT WIFI controller

Mi-Light-RGB-CCT-WIFI controller With built-in wifi module, you can now use your smartphone as a remote control.

Color control system for 12V and 24V that can adjust both color and colortemperature - both RGB, warm white and cold white light. This means that the controller and the remote/smartphone can control up to 5 color channels at the same time. Said in another way, you can control color, brightness, saturation and color temperature!

WIFI
This edition comes with built-in 2,4Ghz wifi, so you don´t have to buy a wifi chip. The built-in wifi control means, that you can control the light through an app from your smartphone exactly as it was the remote control you had in your hand.

The app that is downloaded is comfortable with the App Store and Google play.
App: Miboxer
Comfortable with Google Assistant

Controller

The controller is controller wireless (2.4Ghz) from a remote or your smartphone. Each controller works as a repeater, which allows you to handle many controllers over a long distance, as long as they are in contact with each other. The controller also synconize effects automatically, so that they follow each other.

- Five color channels with 1 output each (5 x 6A)
- Max 15A

There are screw terminals on all inputs and outputs, as well as a DC plug on the input, if your power supply has this (5.5 x 2.1mm)
